Solution Architecture

Project details

Date: 28 October 2026

Team ID: en25el3010067

Project Name: Electric Vehicle Market Analysis Using Tableau

Maximum Marks: 4 Marks

2. Component Description Table

Copy the following into the three blank rows. Add more rows if your template allows.

Component Name	Description / Role in Architecture	Technology Used
Data Source	Stores EV market data, including sales, manufacturers, battery types, driving range, and other vehicle attributes.	CSV / Excel Dataset
Data Preparation and Analysis	Connects to the dataset, checks data types, filters records, and creates calculated fields and measures for analysis.	Tableau Desktop
Visualization and Dashboard	Displays 9 visualizations across 3 scenarios to compare EV sales, manufacturers, driving ranges, battery technologies, and market trends.	Tableau Desktop, Tableau Public
