Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

I am

Emily Johnson, an EV Market Strategy Director who needs to understand sales performance and customer preferences across electric vehicle categories.

I'm trying to

Identify the best-performing EV categories, compare driving ranges, and understand annual sales trends to improve product and market strategies.

But

Sales, vehicle specifications, and performance information across categories can be difficult to compare and interpret efficiently.

Because

Relevant information is spread across multiple data fields, making it challenging to identify patterns and compare vehicle categories without consolidated visual analysis.

Which makes me feel

Uncertain about which EV categories to prioritize and which product or marketing decisions are most appropriate.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Emily Johnson, EV Market Strategy Director	Identify leading EV categories and sales trends	Comparing categories and driving ranges is difficult	Market information needs consolidated analysis	Uncertain about product priorities
PS-2	David Chen, Automotive Business Intelligence Manager	Compare manufacturers, production countries, and battery technologies	It is difficult to evaluate competitive performance across multiple factors	Manufacturer and battery data require systematic comparison	Challenged when recommending market strategies
