Project Name: Electric Vehicle Market Analysis Using Tableau

Maximum Marks: 2 Marks

2. Copy these entries into the table

S.No.	Component	Technology	Justification / Purpose
1	Programming / Query Language	Tableau Calculated Fields	Used to perform calculations, aggregate sales data, and analyze EV market metrics.
2	Database / Data Warehouse	Excel / CSV	Stores the EV dataset containing sales, manufacturers, battery types, range, and other vehicle information.
3	Data Ingestion	Tableau Data Connection	Imports the EV dataset from Excel or CSV into Tableau for analysis.
4	Data Transformation and Business Logic	Tableau Desktop	Used to prepare data, create calculated fields, aggregate metrics, and organize data for visualizations.
5	Data Visualization / Analytics	Tableau Desktop	Creates nine visualizations across three scenarios to analyze sales, manufacturers, battery performance, charging efficiency, and environmental impact.
6	Front-End / User Interface	Tableau Dashboard / Tableau Public	Displays interactive charts and dashboards so users can explore EV market insights.
